- 2- Check that all dissemination-related activities have found adequate space on your multimedia channels.

After asking the students for informed consent we sent 18 photos (photo voice) and titles in English and German to Thieny Ribeiro (and Gianmarco), half he posted in facebook and the same in instagram mostly anonymous.

- 3- Indicate your links used for communication & dissemination to refer to from the project site: Since the beginning of our moodle platform and our homepage I used in my Email signature [De4PP – Death Education for Palliative Psychology E-Learning Facebook Instagram Twitter](#) In more than three years this went to thousands of recipients.
- 4- We have to make the access to the moodle platform completely open and to share all course content and other project activities on the project website:
Thank you.

The automatic translation from the Italian evaluation is tricky, but I try my best to understand. Some comments:

IO2 reports are in most languages in moodle, except Hebrew.

Our students got 6 ECTS- credit points besides the certificate.

The impact out side the course was made in multiplier event/conferences and is also documented in 13 quarter reports.

It is still ongoing after closing the project in October:
